

## CFL-655B, 657B, 660B, 670B and 675

### Double Wall Coffee Glasses

FilterLogic™ coffee glasses are hand-blown from borosilicate glass and feature our Thermoshield technology. These glasses feature a double-wall design that ensures your drink retains its temperature for longer whilst the exterior remains cool to the touch. They are also resistant to thermal shock.

As well as these functional benefits, the glass composition allows the distinctive layers produced by automatic coffee machines to be clearly seen – adding to that barista at home experience.

#### CFL-655B Espresso Glasses

Twin Pack

##### Specifications
